HUSCO's 9910 Hydraulic Control Valve Series

HUSCO International introduces the new, cost-effective 9910 hydraulic control valve series. This flexible valve series can be configured for your specific hydraulic application.

- Flow rate: 30 GPM at 145 psi– Pressure rating: 5,500 psi
- Cost-effective monoblock design reduces sectional leakage
- 9-spool monoblock design with ability to stack-on up to 3 additional spool sections
- Precision sharing uses closed-center load-sensing circuit with HUSCO IsoComp® pressure compensation
- Main and workport relief valves and anti-void cartridges
- Spool actuation: manual, hydraulic pilot, and electrohydraulic
- Applications: mini-excavator, motor grader, etc.
